KREŠIMIR ŠENCAJ
Web Developer

Web developer with more than 5+ years experience building pixel perfect websites. Flexible in working environments having positioned for startups and digital agencies. Focused on helping agile teams with UI devlopment for large scale projects or client-side web apps.

Experienced in hand-coded, valid, and cross-browser websites using XHTML, CSS, JavaScript, JQuery debugging skills and thorough understanding of cross browser issues, as well as knowledge of version control systems (Git), LAMP architecture and MVC paradigm. Able to work in a fast-paced environment on multiple projects simultaneously.

Not limited to work experience. Constantly improve technical skills and practical knowledge through working on personal web projects and reading articles related to best codding practices.

More about Noclayer:

Noclayer is a software designed to manage devices and equiment in data center. The main goal is to provide information about each device in the rack. Therefore, we concentrated on the concept of developing and upgrading capabilities that each device has. An intuitive web interface provides a visual view of the cabinets, as well as drag & drop layout devices.
